UPCOMING ACTIVITIES

• Soil Nail Shoring will continue on the north and west sides of the excavation

• Excavation activities will continue this week through the month of February

• Concrete placement for foundations will start early March!

FUN FACTS

When Keating BIO 5 was built, we planned ahead for the BSRL building and included extra capacity in the electrical/heating & cooling systems.

View of BSRL construction site from the WEBCAM
Shotcrete Walls are being installed along with the soil nails to provide the stabilization of the excavation.

Shoring Installation is progressing along the west side of the site.
